

### KEY FEATURES

#### High Income Potential

SDEM accesses 50 of the highest yielding stocks in the emerging markets, potentially increasing a portfolio's yield.

#### Monthly Distributions

SDEM makes distributions on a monthly basis, providing a regular source of income for a portfolio.

#### Value with Growth

Investing in high dividend yielding securities in the emerging market space combines a value-oriented investment approach with exposure to markets that are expected to grow at a faster pace than developed markets.

The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. High short-term performance of the Fund, when observed, is unusual and investors should not expect such performance to be repeated. Returns for periods greater than one year are annualized. [Click here](#) for standard performance as of the most recent quarter-end.

## DEFINITIONS

|   |   |
|---|---|
| MSCI Emerging Markets Top 50 Dividend Index | The MSCI Emerging Markets Top 50 Dividend Index is based on the MSCI Emerging Markets Index, its parent index, which includes large and mid-cap stocks across 23 Emerging Markets (EM) countries. The index aims to reflect the performance of 50 securities from the MSCI EM Index, selected by dividend yield that have increased or maintained their dividend per share compared to the previous year or have increased or maintained their payout ratio (defined as dividend per share/earnings per share) if the dividend per share has dropped by up to 10%.  |
| MSCI ACWI Index                             | MSCI ACWI Index captures large and mid cap representation across 23 Developed Markets (DM) and 27 Emerging Markets (EM) countries. The index covers approximately 85% of the global investable equity opportunity set. DM countries include: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the UK and the US. EM countries include: Argentina, Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Kuwait, Malaysia, Mexico, Pakistan, Peru, Philippines, Poland, Qatar, Russia, Saudi Arabia, South Africa, Taiwan, Thailand, Turkey and United Arab Emirates. |
| 12-Month Trailing Yield                     | The distribution yield an investor would have received if they had held the Fund over the last twelve months, assuming the most recent NAV. The 12-Month Trailing Yield is calculated by summing any income, capital gains and return of capital distributions over the past twelve months and dividing by the sum of the most recent NAV and any capital gain distributions made over the same period.   |
| Annualized Volatility                       | The annualized standard deviation of the daily returns of the security using the closing levels of the index during the 22 index-day period preceding that day.   |
| Beta  | Measures the volatility of the Fund price relative to the volatility in the market index and can also be defined as the percent change in the price of the Fund given a 1% change in the market index. A beta below one suggests that the Fund was less volatile than the market benchmark.   |
| Sharpe Ratio                                | Measures the return for each unit of risk. The risk free rate is subtracted from the mean return and is divided by the standard deviation of returns.   |

(1) The Fund's name, investment objective, and investment strategy changed effective November 16, 2016. The Fund inception date reflects the original inception date of the Fund when it was the Global X SuperDividend Emerging Markets ETF.

(2) The Hybrid SuperDividend Index consists of the INDXX SuperDividend Emerging Markets Index from the inception of the Fund through November 15, 2016, and the MSCI Emerging Markets Top 50 Dividend Index going forward.

Investing involves risk, including the possible loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. High yielding stocks are often speculative, high-risk investments. These companies can be paying out more than they can support and may reduce their dividends or stop paying dividends at any time, which could have a material adverse effect on the stock price of these companies and the Fund's performance. Past distributions are not indicative of future distributions. There is no guarantee that dividends will be paid. SDEM is non-diversified. The information provided is not intended for trading purposes, and should not be considered investment advice.

***This material must be preceded or accompanied by the current fund prospectus. Read it carefully before investing.***

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Beginning October 15, 2020, market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share. Prior to October 15, 2020, market price returns were based on the midpoint between the Bid and Ask price. NAVs are calculated using prices as of 4:00 PM Eastern Time. The returns shown do not represent the returns you would receive if you traded shares at other times. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
